PROFESSIONAL SUMMARY

Frontend Developer with 4 years of hands-on experience in Angular development, building scalable, high-performance apps. Expert in TypeScript, NgRx state management, and REST API integration, with additional experience in React and Next.js and growing expertise in applying AI tools to improve development workflows, automate tasks, and enhance user experiences. Strong collaboration skills with UX/UI teams and a passion for clean code, performance optimization, and delivering seamless user experiences.

TECHNICAL SKILLS

Languages & Markup: JavaScript, TypeScript, HTML5, SCSS/CSS3

Frameworks & Libraries: Angular, NgRx, Material UI, RxJS, React, Next.js, Chart.js, pdf-lib, Tailwind CSS

Tools & Platforms: Git, npm, yarn, REST/GraphQL APIs, Figma, Jira, ActiveCollab, Supabase, Asana, AI Tools (ChatGPT, Copilot, Claude.ai, Cursor)

Other: Responsive Design, Cross-Browser Compatibility, Agile/Scrum, Unit Testing

Other Languages (basic knowledge): SQL, C, C#, C++

PROFESSIONAL EXPERIENCE

Frontend Developer
Paprikart – remote | 10/2021 – Present

- Developed and maintained scalable applications using Angular and TypeScript
- Built reusable UI components with Angular and Material UI, ensuring consistency and faster development cycles
- Implemented state management using NgRx for complex application states and enhanced app performance
- Integrated REST APIs and handled reactive data streams with RxJS
- Engineered interactive data visualizations using Chart.js and developed PDF export features with pdf-lib
- Collaborated closely with UX/UI designers (Figma) for pixel-perfect, responsive designs
- Participated in Agile processes (Jira, ActiveCollab), code reviews, and sprint planning
- Led cross-browser testing and accessibility improvements
- Reduced app load time by 30% through code splitting and lazy loading
- Mentored 1 Junior Developer

PERSONAL PROJECTS

Tipsy Trials (MVP phase) - Built using **React (Next.js)**, Tailwind CSS, Supabase
https://www.tipsytrials.com/
Founded and developed a multiplayer party game web app using Next.js.

- Handled full project lifecycle including coding, deployment, and maintenance
- Built dynamic player flows and real-time features with Supabase
- Developed custom admin panels for content management
- Integrated Google Analytics for tracking
- Focused on SEO, performance optimization, and mobile responsiveness
- Collaborated with team members using Asana for task management and coordination
- Developed Android/iOS versions using React Native

EDUCATION

Tehnička škola "Rade Metalac" Leskovac - Information Technology
Faculty of Electronic Engineering - Computing Science and Informatics

LANGUAGES

- **Serbian** - Native
- **English** - Fluent
